## DETAILED ACTION

### *Allowable Subject Matter*

1. Claim 1-7 and 10-20 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claims 1 and 13 are allowable over the prior art of record since the cited references taken individually or in combination fail to particularly disclose **an apparatus comprising: a first operator for receiving a first data type over a first channel and forming a representation of this first data type, a second operator for receiving a MAC data type over a MAC data channel and stripping the informational content out of the MAC data-type portion to form a representation of the MAC data portion, and a channel phase estimator for receiving representations of the first data type and the MAC data type and estimating the channel phase responsive to values of the representations of both data types.**

It is noted that the closest prior art, Ling (US 6377607) discloses an apparatus for receiving a pilot signal on a pilot channel and using a channel estimate circuit to calculate a phase channel estimate. However, Ling fails to disclose or render obvious the above underlined limitations as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

**Conclusion**

3. The prior art made of record and not relied upon is considered pertinent to the applicant's disclosure.

(a) Crawford (US 6549583) discloses a method and apparatus of pilot phase estimation in a receiver where weighting is applied.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher P. Grey whose telephone number is (571)272-3160. The examiner can normally be reached on 6:30-3:00.
